

To Whom It May Concern:

I am writing this letter in support of the nomination of Julie Whitehead for the Impact Award.

Julie is committed to taking technology and making it less intimidating to faculty and support staff. She has excellent skills in facilitating conversations and bringing the “human factor” to technology. Whenever I have asked for assistance Julie is incredibly responsive. She is highly motivated in exploring ways technology can support our business processes and the work of the three Schools. For example she has created spreadsheets to support tracking less than full time salaries, sick time and Course Information Sheets. She also created a Database to track competencies in a number of Health Sciences programs which allows the programs to meet their accreditation requirements. Julie has also set up portals for team projects on the shared portal and is active in recruiting new faculty and staff who are not currently using these tools.

I believe that Julie’s impact has made an enormous difference to the use of technology throughout the Faculty of Health Sciences, Human Services and Nursing and she continues to broaden our knowledge and use of new tools daily.

Please access Julie Whitehead’s e-portfolio site which has a link to a lot of her work.
